M.A. Silva Corks, USA Expands Sonoma County Facility

Santa Rosa, California (August 14, 2009) -- M.A. Silva Corks, USA (www.masilva.com) has recently expanded its administrative offices in Sonoma County.

The key factors in M.A. Silva's decision were a steady growth in sales and its ongoing commitment to provide unequaled customer service.

The additional space accommodates a second conference room, private offices for management, cubicles for sales and administration, and room for anticipated growth.

The current staff outgrew the office space included in the original design. The \$4 million, 30,000-square-foot structure opened in 2007, providing this supplier of natural cork wine stoppers with a state-of-the-art food-grade facility.

M.A. Silva Corks, USA (www.masilva.com) provides the finest natural corks to the premium North American wine industry while demonstrating impeccable integrity and consistent personal service. As a member of the Cork Quality Council, the vertically integrated company continuously invests in the latest technology to ensure that all products meet the most rigorous standards of quality control.
